

Bamboo Story

RIDE THE FUTURE

About us

At Bamboo Story, we are not just crafting bicycles; we are cultivating a movement towards sustainable mobility, community empowerment, and environmental stewardship. Our journey began with a vision, a vision held by our founder, Kiran Agadi, who sought to redefine the way we commute while making a positive impact on both people and the planet.

Our Commitment to Sustainability

Bamboo Story is built on a foundation of sustainability. We have embraced bamboo as our primary material, harnessing its remarkable qualities to create bicycles that are not only stylish and functional but also environmentally responsible. Bamboo, a rapidly renewable resource, ensures that our bicycles are lightweight, durable, and leave a minimal ecological footprint.

But our commitment to sustainability extends beyond the choice of materials. Our manufacturing processes are designed to minimize waste and energy consumption, reflecting our dedication to eco-friendly practices. We strive to set a new standard in the industry by demonstrating that quality and sustainability can go hand in hand.
